

A PLASTICO HACKETT ENGINEERING SPECIALTY LINE
[CHEMICAL STORAGE CABINETS]

[SPECIALTY LINE]

Our **Chemical Storage Cabinets** have been designed with ongoing consultation with laboratory technicians to bring you a superior cabinet manufactured from engineering grade high strength polymer that is impervious to most corrosive substances. The internal design of the cabinet incorporates fully adjustable shelves and easy to clean safety containment sump in the event of a spill. Auto closing doors with locking catches allows chemicals to be securely stored at all times.

[CUSTOMISED ENGINEERED PRODUCTS]

A PLASTICO HACKETT ENGINEERING SPECIALTY LINE
[CHEMICAL STORAGE CABINETS]

FEATURES AT A GLANCE:

- Impervious to most corrosive substances
- constructed from high strength polyethylene
- cabinet case jointed with mechanical fixing
- magnetic door catches
- secure key operated door locks are optional
- no exposed internal metal components
- fully adjustable shelving
- optional shelving configurations
- all signage rebated
- liquid tight sump compartment
- hinges and handles fixed via metal thread inserts
- double door units can be configured for both acids and alkalis
- optional vent kit
- complies with AS 3780-1994.

Our attractive cabinets are produced in a white chemically resistant polyethylene to enhance your environment and provide the added safety of increased natural light inside the cabinet.

CABINET REFERENCE	WIDTH	HEIGHT	DEPTH	CAPACITY	NOS of SHELVES
SINGLE DOOR
